

# TC-100 Ride On Snow Sweeper

The type of TC-100 ride on snow sweeper is new product developed by our company, this type machine is use chassis of ATV and equipped with power snow brush, and the width of brush is 100cm, and can swing about 20 degrees. The integrated design also has independent power unit, which makes the snow sweeping effect have greatly improved. Driving type snow sweeping method greatly reduces labor intensity, and the crawler rear wheel is used on ice and snow ground, and the anti-skid effect is significantly improved. In the winter of 2020, this type snow sweeper will bring you more safety, convenience and efficiency!

## Introduction of Chassis

Engine: ZongShen 110CC

3 forward gears, 1 backward gears

Electric Start

Automatic clutch engine

## Vehicle configuration:

Chain of transmission, Single meter, Front drum brake, rear disc brake.

5L oil tank, front double shock absorption and rear single shock absorption

Double aluminum alloy exhaust

The size of body(don't including snow brush ): 140\*73.5\*90CM;

The size of front wheel: 34\*14CM(diameter\*width)

The size of back apron wheel: 47\*29\*12CM(length\*height\*thickness)

The max speed: 50KM/h

Load: 120KG;

Net weight: 70KG、Gross weight: 100KG、Packing size: 144\*78\*90

## Brush system

Engine: Shenzong 6.5hp manual start 、 Gasoline: 3.6L 、 Engine oil: 0.8L;

Diameter of brush: 40CM 、 Width of brush: 100CM ;

Speed on brush: 300r/min、 Material of brush: Nylon steel wire mixing brush;

Net weight of brush: 55KG、 Gross weight: 80KG、 Packing Size: 104\*88\*82
