
Farm Tractor Snow Sweeper For Sale

Part I: Introduction of the tractor snow sweeper

The snow removing equipment is the necessary equipment of snow cleaning for farm, orchard, schools, parks, squares, residential areas, garden, lanes sideways, bridges and other key securing sites and widely used in snow winter.

This equipment could improve the efficiency of snow removal, reduce labor intensity, and ensure people going out more safety and convenient.

Part II: Features of the tractor snow sweeper

1. Our snow removal machine adopts Germany technology, 100% inspection famous brand engine, that ensure it powerful and great suction. Its max throwing distance is from 10m up to 15m. Forward and reverse flexible, make sure the operator easy to work. And there is an adjustable chute, rotary angle up to 190°.
2. The new designed equipment with simple structure is convenient to maintain that can enlarge its service life. The round brush cleaner adopts disc brushes, a mixture of steel wire and wearable nylon brush, make it high wear-resist and high efficiency even on a bumpy and rugged road.
3. All sapre and accessory parts adopts stamping, casting, modeling, plastic injection technical production processes, are all under standardization, large-scale production.
4. All-g geared snowplows adopt multi-function design, and are multipurpose. The special gearbox drive has three or two forward gears, two backward gears and one quick commutator for changing travel direction.
5. The drive of the machine and the assistive devices all adopt gearbox drive, without vulnerable rubber parts like the belt.
6. The machine is equipped with standard lock differential, which makes it easy to swerve and avoid obstacles.
7. The handle can swerve and be adjusted up and down, which makes it not only possible to choose comfortable operating height and angle, but also possible to equip with many different matched assistive devices. The strong structure makes the machine much lighter and smarter.

Part III: Application of the snow sweeper

The advantage of this snow sweeper is suitable for different road conditions. All kinds of snow (soft snow/frozen snow/ice) can be cleaned efficiently without using deicing salt. And the sweeper is very safe for pavement and marking line. Different configurations are available, like snow sweeper, snow shovel, snow blower and so on.

Part IV: FAQ

Q1 What kind terms of payment can be accepted?

A For terms of payment, L/C, T/T, Trade Assurance could accepted.

Q2 What certificates are available in Machinery?

A For the certificate, we have ISO, CE.

Q3 What about the warranty time?

A 18 months after shipment.

Q4 Could we support personalized services?

A Yes, we could personalize product's color and other things.

Q5 Can we support OEM for dealer?

A Yes, we provide OEM for customer.
