Multifunctional Snow Remover PN8130

Product Introduction

Multifunctional Snow Remover PN8130 is a small hand-held snow sweeper, it's very popular with most customers in the market. Its main functions are snow sweeping, snow lifting and snow pushing. The three functions can be interchanged in a few minutes. It can also install small seats, achieve driving snow removal, reduce the labor intensity of operators, and improve the efficiency of snow removal.

The main engine of the snow remover is driven by a 13HP 390 type gasoline engine. The starting mode is electric starting. It output power through the gearbox, with three forward gears and three backward gears. Compared with the traditional belt drive snow sweeper, it has the advantages of low power output loss and low gear transmission failure rate. We introduce the performance of three kinds of products foundation.

Technical Parameters

- | Cleaning Area: 3500 m²/h
- | Max Working Width: 1100mm
- | Tank Volume: 6 L
- | Fuel Consumption: 0.5L/h
- | Horsepower: 13P, 389cc engine
- | Gears: 3 forward and 3 backward
- | Transmission Type: Gear drive
- | Start Mode: Electric start add Hand starting
- | Fuel Type: unleaded gasoline
- | Brush Diameter: 500mm
- | Size of Tyre: 5.0-10

Features

1)Snow sweeping

The width of the snow brush is 1100 mm, it can swing 20° from left to right. The diameter of the brush is 500mm, the material nylon and steel wire, and more abrasion resistant and durable. It only takes three minutes to dismantle and assemble the snow brush and the main engine. Snow brush consumables are cheaper and lower cost of use.

2) Snow blowing

The snow lifting width is 100cm, and thickness is 60cm, and the lift distance is 7-13m. It can be quickly installed and disassembled with the main engine.

3) Snow pushing

Snow shovel width 100 cm, height 50 cm, it can swing 20° from left to right. It can be interchanged with snow brushes and snow blowing, and then achieve a multi-purpose machine, a variety of functions of snow removal.

4) Small Seat

The multifunctional snow remover can be equipped with small seats. It realizes the functions that most snow removers can't achieve, greatly reduces the working intensity of operators and improves work efficiency.

Multifunctional Snow Remover PN8130 is a new model according to the market demand. Its characteristic is that it has the output power of gearbox. Strong power and low failure rate, The multi-purpose form of one machine makes the equipment more economical and advanced. At present, this model has been accepted by most customers, sales are rising year by year.
