G200 Fully Enclosed Driving Flush Sweeper

Introduce production:

G200 is a multi-functional sweeper, equipped with 200kg high-pressure pump, 300L large capacity water tank, which can continuously and efficiently reduce dust and wash the ground. At the same time, it is equipped with double dust collection in dust control. It is normally equipped with imported Curtis controller and 3.7KW drive motor. It has strong power. It is an ideal machine for property, factory, road and municipal sanitation!

Technical parameter:

Model: G200	Cleaning Width: >2000mm
Productivity: >17000m ² /h	Max climbing capacity: 25~30%
Main brush's length: 800*350mm	Side brush's diameter: 500mm
Power supply: 48V Maintenance free battery	Working time: 7-8h
Waste hopper capacity: 240L	Capacity of water tank: 300L
Driving power: 3700W	Operation power: 850+500*2+100*4+50*2
Max working speed: 9km/h	Max driving speed: 12km/h
Filter: 12m ²	Net weight: 1050kg
Machine size: L2400*W2000*H2050	High pressure pump: 3000W

Performance characteristics:

1. Curtis controller, 3.7KW drive motor, strong power, stronger climbing ability
2. The shell material of the whole vehicle is rotational plastic water tank integrated design, the water tank capacity is up to 300L, and the covering parts are durable
3. All the key connectors are flame retardant and waterproof, with high safety configuration. All motors are 24-hour waterproof
4. The imported waterproof and oil proof filter element can filter dust efficiently, and the electric vibrator can clean the filter screen automatically
5. Adopt advanced high-performance maintenance free battery, no leakage, no harmful gas
6. High quality electric control system, over-current, under voltage protection, more safe, anti slip broken
7. Equipped with high pressure washing, fog pipe and high pressure pump, the pressure is 200kg, which can effectively control dust and clean the road
8. All LED headlights, high pressure atomization dust suppression system, to avoid secondary dust
